

Tejash Tarun

Software Engineer | AI/ML & Full Stack Developer

+916207755619 • tejashtarunofficial@gmail.com • linkedin.com/in/tejashtarunofficial • github.com/tejash05 • Patna, Bihar

Summary

Full Stack Developer and AI/ML Engineer with hands-on experience in **end-to-end ML pipelines, LLM integration, and scalable backend systems**. Shipped production-grade applications at **NDL Power Limited**, reducing manual effort by 30% through real-time AI automation. Built **XGBoost-powered threat detection** and **Gemini-integrated mental health backends** showcasing strong applied ML ability. Recognized as a **Smart India Hackathon National Finalist** and **HackSRM 6.0 Winner**, with a problem-solving mindset grounded in **data structures, algorithms, and clean architecture**.

Experience

NDL POWER LIMITED

Full Stack Developer Intern

Remote

11/2025 - 04/2026

NDL Power Limited develops digital platforms and automation solutions for power and utility operations

- Developed scalable full-stack applications using React.js, TypeScript, Node.js, Express.js, and MSSQL with **lazy loading and database indexing**, building modules for asset management, transformer sampling, QR tagging, and expense tracking across **5+ core business workflows**.
- Integrated REST APIs, webhooks, and Meta WhatsApp services for real-time communication across 3+ AI providers (OpenAI, Claude, Gemini), automated workflows reducing manual effort by ~30%, and supported CI/CD pipeline and deployment workflows for faster, more reliable releases.
- Enhanced fault-tolerant and scalable systems by implementing server-side pagination, query optimization, and database indexing for low cost at scale.

SmartInternz

Salesforce Developer Intern

Remote

11/2023 - 01/2024

Salesforce Developer role focused on optimizing and delivering features to enhance user experience

- Applied and optimized Apex with focus on testing and debugging, improving query performance by 20% across 5+ modules
- Delivered and maintained 10+ features across mini-projects using clean code practices and Git workflows
- Designed and automated relationship models using 3 tools: Workflow, Process Builder, and Approval Processes, reducing manual effort by 30%

Projects

NeuroWell – AI Mental Health Simulation System

01/2025 - 05/2025

FastAPI, Gemini 1.5 Pro, LangChain, MongoDB, ChromaDB

[GitHub](#)

- Engineered an emotionally intelligent chatbot using Gemini 1.5 Pro and LangChain with context-aware responses for stress, anxiety, and depression detection
- Built an LLM-driven PDF report generation pipeline extracting user concern, session summary, and metadata; stored securely in MongoDB GridFS
- Designed a Chroma vector DB layer for session memory and retrieval-augmented response generation across multi-turn conversations

SafeClick – Phishing & Clone Detection System

02/2025

XGBoost, MERN, SSIM, Python, Chrome Extension

[GitHub](#)

- Trained an XGBoost classifier on URL behavioral features, domain reputation signals, and WHOIS metadata to detect phishing and malicious URLs with high precision
- Built a clone website detection pipeline combining SSIM-based visual similarity scoring and HTML structure analysis to identify fraudulent site replicas
- Deployed as a Chrome extension with a MERN dashboard providing real-time safety alerts and detection analytics across users

The Insights

08/2025 - 09/2025

Next.js, Node.js, Prisma ORM, PostgreSQL, Recharts, JWT

[GitHub](#)

- Built a multi-tenant Shopify ingestion platform syncing customers, orders, and products across **6 data models** via webhooks.
- Engineered a multi-tiered data pipeline across relational PostgreSQL models handling ingestion, isolation, and analytics at scale.
- Developed insights dashboard with SSR-powered pages for revenue trends, top customer rankings, and date-filtered order analytics.

Education

SRM University-AP

08/2022 - 05/2026

B.Tech - Computer Science and Engineering (AI/ML) | CGPA: 8.35

Skills

Languages: Python • JavaScript • TypeScript • HTML • CSS • SQL • C++

Frameworks & Libraries: React • Next.js • Node.js • Express.js • Flask • FastAPI • TailwindCSS • Bootstrap • Prisma ORM

Databases, Tools & Deployment: SQL • MongoDB • Git • GitHub Actions • Docker • Postman • Vercel • AWS • Jupyter Notebook

ML/AI: XGBoost • Scikit-learn • LangChain • RAG Pipelines • Gemini API • ChromaDB • FAISS

Achievements & Certifications

Research Publication — Efficient Fall Detection Using Lightweight Geometric Features and Gradient Boosting Classifiers | IEEE ETAICT 2026

Hackathon — HackSRM 6.0 AIML Track | Winner, Feb 2025

Hackathon — Smart India Hackathon 2025 | National Finalist

Certifications — Supervised Machine Learning: Regression & Classification | Advanced Learning Algorithms | DeepLearning.AI, Stanford University

Problem Solving — Solved 270+ problems across LeetCode and CodeChef | Arrays, Trees, Dynamic Programming, Graphs
