

Tejash Tarun

Software Engineer | Full Stack Developer

+916207755619 • tejashtarunofficial@gmail.com • linkedin.com/in/tejashtarunofficial • github.com/tejash05 • Patna, Bihar

Summary

Full Stack Developer with hands-on experience in React.js, Next.js, Node.js, JavaScript, HTML, CSS, and REST APIs, contributing across the **SDLC** to design, implement, review, and manage scalable web applications. **Collaborated** with cross-functional teams to deliver secure and responsive features, improving query performance by **20%** and reducing manual effort by **30%** through automated workflows. Known for **teamwork, communication, adaptability, creativity, and initiative**, with a balanced focus on performance, usability, and clean engineering practices. Seeking a **Software Engineer** role to contribute impactful, high-quality solutions.

Experience

NDL POWER LIMITED

Full Stack Developer

Remote

11/2025 - 04/2026

NDL Power Limited develops digital platforms and automation solutions for power and utility operations

- Developed scalable full-stack applications using React.js, TypeScript, Node.js, Express.js, and MSSQL with **lazy loading and database indexing**, building modules for asset management, transformer sampling, QR tagging, and expense tracking across **5+ core business workflows**.
- Integrated REST APIs, webhooks, and Meta WhatsApp services for real-time communication across 3+ AI providers (OpenAI, Claude, Gemini), automated workflows reducing manual effort by ~30%, and supported CI/CD pipeline and deployment workflows for faster, more reliable releases.
- Enhanced system scalability by implementing server-side pagination, query optimization, and database indexing. Optimized backend performance at scale.

SmartInternz

Salesforce Developer

Remote

11/2023 - 01/2024

Salesforce Developer role focused on optimizing and delivering features to enhance user experience

- Applied and optimized Apex with focus on testing and debugging, improving query performance by 20% across 5+ modules
- Delivered and maintained 10+ features across mini-projects using clean code practices and Git workflows
- Designed and automated relationship models using 3 tools: Workflow, Process Builder, and Approval Processes, reducing manual effort by 30%

Projects

The Insights

08/2025 - 09/2025

Next.js, Node.js, Prisma ORM, PostgreSQL, Recharts, JWT

[GitHub](#)

- Built a multi-tenant Shopify ingestion platform syncing customers, orders, and products across **6 data models** via webhooks.
- Applied JWT authentication with tenant-level data isolation across **5+ Prisma models**.
- Developed insights dashboard with SSR-powered pages for revenue trends, top customer rankings, and date-filtered order analytics.

XenoCRM

04/2025 - 05/2025

React, Node.js, Express.js, MongoDB, OpenAI, Passport.js

[GitHub](#)

- Engineered an AI-powered Mini CRM supporting campaign creation, GPT-4 message generation, and delivery logging across **3 message variants per objective**
- Implemented **Google OAuth 2.0 and JWT-based authentication** via Passport.js, securing **100% of API routes** with token validation and session management
- Designed communication log system tracking delivered/failed messages per campaign with real-time status updates

HR Dashboard

06/2025 - 07/2025

Next.js, Tailwind CSS, Zustand, Chart.js, NextAuth.js

[GitHub](#)

- Built a full-stack HR system managing **50+ employee records** with real-time search, multi-select filters, and paginated views
- Integrated Google OAuth and credential-based login via NextAuth.js with JWT session and protected routes
- Visualized department-wise performance and bookmark trends across **5 departments** using Chart.js with dark mode support

Education

SRM University-AP

08/2022 - 05/2026

B.Tech - Computer Science and Engineering | CGPA: 8.30

Skills

Languages: Python • JavaScript • TypeScript • HTML • CSS • SQL • C • C++

Frameworks & Libraries:

React • Next.js • Angular • Node.js • Express.js • Flask • FastAPI • TailwindCSS • Bootstrap • Prisma ORM • LangChain (RAG Pipelines) • Generative AI (GPT-4, Gemini)

Databases, Tools & Deployment: SQL • MongoDB • Git • GitHub Actions • Docker • Postman • Vercel • AWS • Render • Railway • Claude • Cursor

Achievements & Certifications

Research Publication — IEEE ETAICT 2026 | *Efficient Fall Detection Using Lightweight Geometric Features and Gradient Boosting Classifiers*

Hackathon — HackSRM 6.0 AIML Track | Winner, Feb 2025

Hackathon — Smart India Hackathon National | Finalist, Dec 2025

Certifications — MongoDB Certified Associate Developer – MongoDB, 2025

Competitive Programming — Solved **270+ problems** across **LeetCode** (120+) and **CodeChef** (150+) applying **DSA and Algorithms**
